After more than three decades of deployments, the tutoring centers have become diverse in their services, but they still maintain their support for vulnerable families. In 2021, despite COVID-19, through the dedication of instructors, companies, tutors, and enthusiastic high school and college students, the centers have continued to provide free academic guidance to students in remote areas and vulnerable families. Even though life is in turmoil and social distancing prevents face-to-face encounters, through the combined efforts of all parties, these students can still persist in their studies.
